Mr. David Canfield
Superintendent, Rocky Mountain National Park
Estes Park, Colorado

Dear Mr. Canfield:

I am a little bit delayed in thanking you for your kindness in sending me an automobile permit for the Rocky Mountain National Park for this season. I need not tell you that I am very grateful to you for this evidence of your continued kindness and I shall certainly make use of it.

As an item of information to you I recently had lunch with an Executive of the Carnegie Museum in Pittsburgh. I believe that they are repository for a great deal of the Dinosaur material which came from Dinosaur National Monument. I believe, also, that the National Park Service is more or less depending upon the Carnegie Museum to hold on to enough of this material to make it possible for the National Park Service to set up an exhibit in the Dinosaur National Museum when, if and as facilities permit. This is just a personal word to you in the event that the news has not reached you from other quarters that the Carnegie Museum is unhealthily interested in getting rid of as much of that material as possible. It occurs to me that the National Park Service may be interested in taking steps to see that material which may ultimately form a part of exhibits at the Dinosaur National Monument are not now distributed in such a way to become unavailable.

At the risk of appearing to tell you your business, it occurs to me that it might be possible for you to store a considerable amount of such material in the National Monument as until such time as God, the Congress of the United States and the Department of the Interior (all very estimable I assure you) see fit to provide an adequate structure on the ground in Utah.

Best regards,

Hugo G. Rodeck
Hugo G. Rodeck
